

KIDS COUNT USVI

2022 Political Candidates Questionnaire

As a political candidate in the upcoming 2022 U.S. Virgin Islands Election, St. Croix Foundation's [KIDS COUNT USVI](#) Team invites you to participate in a 2022 Candidate Questionnaire relative to the well-being of children and families in the U.S. Virgin Islands.

Please reflect on and answer each question by **September 26, 2022**. All responses will be housed on EngageVI.org and distributed to media and key stakeholders in our communities, including the KIDS COUNT USVI 'network' of nonprofits, public sector agencies, and national partners. This will give candidates the opportunity to share their platform and perspective with voters, and will give voters the opportunity to evaluate candidates on their engagement with these critical issues.

Please note that responses will be published as received and will not be edited in any way (e.g., for typos, misspellings, grammatical errors). Please direct any questions you may have to lcox@stxfoundation.org and a response will be forwarded promptly.

Submission Directions

1. Please complete the following questionnaire and submit your answers to Lilli Cox at lcox@stxfoundation.org by September 26, 2022, close of business.
2. If there are any technical difficulties with completing, saving, or submitting this form, please contact Lilli Cox at lcox@stxfoundation.org.

Candidate's Full Name

Sherry-Ann Francis

Office sought in the 2022 USVI Election

Governor

Senator - STJ-STT

Senator - STX

Senator - VI

**1. For the last school year with publicly available data (SY2018-2019), the highest retention rate among students in public school occurred in the 9th grade, with almost one-third of students (30%) being retained. (See page 25 of the [2021 KIDS COUNT USVI Data Book](#).)*

While more recent data from the VIDE indicate that there has been some improvement in retention rates, given the data, what specific policies and/or interventions would you utilize to address this critical issue?

What funding opportunities/resources are you aware of that could be used for cross-departmental initiatives?

As the legislative branch, we ensure that funding is provided to schools to fully staff school counselors and learning strategists. Also, promote the development of a comprehensive retention plan from the Board of Education, with the input of stakeholders, as subject matter experts, they are the best entity to develop the plan. If additional funding is needed, the legislative branch can identify funding. Counselors and learning strategists would work with teachers to pinpoint at-risk students and create strategies to keep them excited about school and address any deficits they may face. This can also help address any at-home pulls affecting their school retention.

**2. The KIDS COUNT team recognizes the inextricable link between our nonprofits/social impact organizations and children and families and is conducting interviews with local social service organizations, providing insight into the importance of and dire need for community resources in the USVI that provide sustainable safety nets, relief, and enrichment in our children's lives.*

What policies and/or amendments would you advocate for to support nonprofits that serve children and families in the areas of health, education, housing, public safety, and economic well-being?

Providing funding opportunities to nonprofit organizations that are on the ground providing services is essential to giving students positive alternatives. As a legislature, we can assist with identifying funding.

**3. On a national level, KIDS COUNT data are derived from many sources, including the American Community Survey (ACS), which contains housing, economics, demographics, and social data. Unfortunately, the ACS is not conducted in the USVI. In the absence of the ACS, the territory administers (via the Eastern Caribbean Center) the Virgin Islands Community Survey (VICS), collecting data similar to that included in the population and housing components of the decennial Census. The last published VICS was released in 2018 (reflecting 2015 data), with the release of 2018 data expected in 2022. (See page 6 of the [2021 KIDS COUNT USVI Data Book](#)).*

Given the territory's challenges around data collection and the rapidly changing ecosystem our children and families live in, what do you propose to improve data collection and usage for policy decisions in the USVI?

The University of the Virgin Islands or the Bureau of Economic Research should be tasked with conducting a similar provided that funding is provided through legislation.

**4. According to the most recent available data (2019-2020 school year), 54% of English Language Learner (ELL) public high school students did not graduate in 4 years compared to 71% of all public high school students (page 27, [2021 KIDS COUNT USVI Data Book](#)).*

How do you propose we support ELL students and address their academic, social, and emotional needs to improve their educational outcomes?

With the increased number of English Language Learners (ELL) students, an English Language Learners Advisory Council should be codified to develop a comprehensive plan to address the ELL student's needs. This may include using advocates to engage with students and parents directly. Many issues stem from the language barrier between the Education system and parents. Also, we can fund incentives for teachers to obtain ELL certification.

**5. In 2018, 36% of surveyed public high school students “felt so sad or hopeless almost every day for 2 or more weeks in a row that they stopped doing some usual activities” (page 38, [2021 KIDS COUNT USVI Data Book](#)) - a response often associated with clinical depression.*

What do you consider to be some of the primary contributing factors to the mental health challenges facing our youth, and what are some of the systemic 'fixes' to the Territory's mental health infrastructure?

Mental Health can be triggered by trauma, substance abuse, bullying, family issues, etc. The Legislature can advocate and provide for school psychologists, school counselors, or school therapists that will provide counseling, interventions, assessments, and early testing. Wrap-around services should be provided to the families as well whether it's through education or nonprofits.

**6. Opportunity Youth are generally defined as those young people between the ages of 16 to 24 years old who are considered “disconnected” from school and work (i.e., not in school and not participating in the labor market), according to the Annie E. Casey Foundation. Data on Opportunity Youth in the USVI are minimal and variable from year to year. Previous KIDS COUNT Data Books report that between 2005 and 2014 the percentage of teens ages 16 to 19 that were not in school and not working fluctuated from a low of 11.3% (in 2006) to a high of 27% (in 2013).*

What specific steps and strategies would you develop to reconnect this population?

Education system reform is key to addressing the disconnection of young people ages 16-24. Opportunities should be provided for traditional learning and alternative education (trades). For example, the Board of Education(BOE) needs a more substantial role in decentralizing the education system. As the public votes on the BOE, parents, teachers, and other stakeholders will have more significant input into the system. Additionally, we can provide funding for after-school programs, internships, and sports, thereby increasing youth engagement.

Thank you for participating.
